Edition 31

18V + 18V → 36V

Cordless Combination Hammer DHR263ZK 26mm

**LXT
LITHIUM-ION**

**Powered by two 18V
Li-ion batteries in series**

Two 18V Li-ion batteries can be directly installed on the machine to supply energy to the powerful 36V DC motor drive system. The compatible batteries are: 1.5Ah BL1815N, 3.0Ah BL1830, 4.0Ah BL1840.

**Outstanding Performance
and Compact Design**

Anti-slip soft grip

Reverse switch
operable by one hand

**Adapted for
SDS-PLUS bits**

Variable Speed

Dust Collecting

Torque Limiter

Reversing

Bit Not Included

One touch slide
chuck adapted for
SDS-PLUS bit

40 different bit-angle settings

Elastomer for front guard

Dust cup (option)

can be attached using adapter.

Batteries and Charger NOT included.

**Vibration absorbing handle
provides comfortable operation.**

Ergonomically designed to:

- give maximum power thrust.
- provide a sure and comfortable grip.

3 mode operation

- Rotation only
- Rotation + Hammering
- Hammering only

Battery capacity warning lamp

When remaining battery capacity decreases below a certain limit, the motor automatically stops and solid red light reminds you to replace battery. One warning lamp for each individual battery.

MakTimesSA

1

2x 18V batteries will power the 36V DC motor.

The 36V DC motor delivers more power and run time without leaving the 18V Lithium-Ion platform.

When different capacity batteries are used together (for example, 4.0Ah BL1840 and 3.0Ah BL1830, or fully charged BL1830 and 70% charged BL1830), the machine stops when the battery with less capacity is empty.

Woodlife: A new SA brand in high quality wooden toys

Woodlife, founded by master carpenter Harold Jacobs from the Netherlands, has been operational in South Africa for over 10 years now, but only recently established the **Center for Craftsmanship in Harrismith** (Free State). The Center started the toy production line in high quality wooden toys in 2012, in an effort to offer a local alternative to imported toys while creating jobs and transferring skills. Features of Woodlife's toys are: high quality, nice design, environmentally friendly, handmade, and sustainable. **They are all made using Makita and Maktec tools, in South Africa.**

The most recent release and first item in the outdoor range is the **Swift bike**: a wooden balance bike for children between 2-4 years old. Balance bikes are the perfect introduction to life on two wheels for youngsters. In a fun and easy way, it helps them learn balance and coordination (steering, riding and stopping); it promotes muscles and motor skills; it improves confidence and independence.

While having endless fun!

The Swift bike is unique in its design as well as the use of "rubber wood", a solid wood which makes the bike strong and durable. Also, rubber wood is **the most environmentally-friendly wood available.**

In a highly systemized production process, where each workstation is equipped with a jig to guide each action, **each part of the bike is hand-made** (using Makita and Maktec power tools only).

Concluding, this system leads to job creation and skills development in a scarce skill area, contributing to the local economy of South Africa. Woodlife can set up a production line for any desired wooden item.

For more information and toy images, please visit: www.woodlife.co.za

Back In Time With Makita

Johannesburg

Albert Mostert, a local woodworker from Johannesburg, enjoys building "grandfather clocks" during his spare time, and his tool of choice is Makita. He only uses solid hardwood and does not use man-made fibres such as plywood or pressed wood. Albert says by making use of hardwood it puts a lot of strain on all woodworking tools, but Makita can take the strain and is extremely accurate when it comes to cutting, routing or drilling. Having used other well known brands, he has found Makita to come out on top for reasons mentioned above, as well as the after sales service that Makita delivers, which Albert believes to be the best in the industry having experienced Makita's support on a first hand basis.

To make the clocks, Mr Mostert focuses his attention on the Makita RP1800X 12.7mm router to make all rebates in the doors. To fit the door hinges, the RT0700CX5J trimmer / router kit is incorporated. It is also used to do all smaller work in places that is too small to facilitate the bigger routers. Screwing the hinges down is accomplished using a 4.8V 6723DW cordless in-line screwdriver, seen as having enough torque by Albert which fits his hand like a glove. All holes that are drilled is done with a 14.4V 8281D cordless percussion driver drill and the 18V BHP456ZK cordless impact driver drill, the latter being seen as the favourite, having a lithium-ion battery and 50Nm of torque. The long planks are cut into workable sizes with a 26mm jig saw, 4350FCT, which is not afraid of any thickness of wood. Albert is very impressed with the speed at which the DC18RC fast charger charges the LXT batteries, just under 22 minutes(3.0Ah), which puts him back to work in no time at all. The RP2301FCX 2,100W router is used for the heavier work, such as cutting stile and rail grooves as well as the raised panels.

New Product Maktec Tools

Recipro Saw MT450TK

Available
February
2015

Features include a tool-less blade clamp where the blade can be set in place

with a single insert and removed simply by turning the blade clamp.

Tool-less shoe adjustment enables shoe adjustment by simply pressing the button. Large trigger switch enables variable speed for extremely accurate cutting. Soft grip provides comfortable operation.

Dustproof and drip proof design -

1. Front side of the slider is protected against saw dust by;

(1) Air from the fan that sweeps saw-dust.
(2) X ring and Felt that seal out saw-dust from the gear room.

2. Gear room is protected against water drops by placing a rubber seal ring on the mating surface between gear housing and gear housing cover.

Capacity in pipe: 130mm, in wood: 255mm
Length of stroke 28mm
1,010W motor. Strokes per min.: 0 - 2,800

Rotary Hammers HR4013C and HR4003C 40mm

**NEW
PRODUCTS**

Adapted for
SDS-PLUS bits

Bit Not Included

**1,100W
Motor**

AVT SOFT NO LOAD
ANTI VIBRATION TECHNOLOGY

*HR4013C comes with AVT
- Anti Vibration Technology
and Soft No Load

- reduces vibration of tool body when idling, accordingly decreases the amount of vibration to operator's hands during a day's operation.
- minimizes deflection of bit tip from aiming point when starting chipping.

*Both models include

- One touch sliding chuck for easy bit changes.
- Torque limiter

Impacts per min
1,450 - 2,900
No load speed
250 - 500r/min

- Easy-to-operate operation mode change lever (3 operation modes)
- The mode lock lever of the current HR4011C series is eliminated for easier mode change.
- Located on the top of the motor housing for reduced possibility of breakage even if the machine is carelessly laid.
- Soft grip provides more comfort and control.
- Electronic with:
Constant speed control.
Soft start for reducing start-up torque.

Remarkable Solutions CC **Local Company Mad About Makita**

Contact Charles
082 053 6152

Charles Mitchell, owner of local company Remarkable Solutions, has a love for Makita power tools which he uses on a daily basis and is continuing to grow his collection, especially the Makita 18V cordless LXT models which he admits to trying to collect the entire range as it makes the job so much easier and quicker. The company specializes in handyman work, construction of new carports, all welding work and steel designs, horse box refurbishments, minor building work and household alterations.

Editor's Notes

Rutherford - Makita Power Tools SA would like to take this moment to congratulate Makita on their 100-year anniversary which will be celebrated worldwide by all Makita's subsidiary offices and manufacturing/assembly plants.

As 2015 approaches, Makita will continue to lead, and meet demands such as raising productivity and reducing labour, which are driving forces in the construction world, with tools and accessories that help professional users solve problems and make them more efficient.

More exciting details on Makita's 100-year milestone will be announced soon, so watch this space.
